Spark (Swipe Series)

Synopsis

In a future United States under the power of a charismatic leader, everyone gets the Mark at age thirteen. The Mark lets citizen shop, go to school, and even get medical care—but without it, you're on your own. Few refuse to get the Mark. Those who do . . . disappear. Parents are looking for fiction that makes Christianity exciting for kids. This series is an alternative to the Hunger Games series and other dark dystopian fiction. It's packed with action and intrigue, but the message is written from a Christian worldview. Logan Langly went to get his Mark but backed out at the last minute. Ever since, he's been on the run from government agents and on a quest to find his sister Lily, who disappeared when she went to get her Mark five years ago. His journey leads him to befriend the Dust, a network of Markless who oppose the iron-grip rule of the government. On the way to the capital to find Lily, the Dust receive some startling information from the Markless community, warning that humanity is now entering the End of Days. Spark introduces nine-year-old Ali, a beggar living in the Dark Lands city of al-Balat. Ali meets a stranger who gives her his tablet, a portal to a tech world that Ali never knew existed. But one day, the tablet begins to communicate back to her—and takes her on a journey that will cross her path with exiled Logan Langly, Chancellor Cylis, and the fierce battle for power that spans reality and the virtual world. Meets national education standards.

Evan Angler is safe, for now. He lives without the Mark, evading DOME and writing in the shadows of Beacon. But if anyone asks, you know nothing about him. Don't make eye contact if you see him. Don't call his name out loud. He's in enough trouble already. And so are you, if you read his books.

When my daughter saw that this book only had two reviews she asked me to please get online and write one for her since she's only twelve years old and has limited Internet access. The following review is coming from her."I read all the other books in this series. I read each book in under two days. I loved each of them and this one did not disappoint. It went in a completely different direction than I was expecting but in a good way. I also liked getting a better view of one of the main characters and seeing what happened in his life that caused him to make the decisions that he has made up to this point. Overall, this is one of my favorite books."

As a mom I struggle to find books that are good for my teen children. Most are dark and have a message that I prefer not to share with them. These books share a message of faith and prepare our children for the issues that may come in the future. Should you take the Mark of the Beast? Christians know the answer to this. This is a story of Christian children who have decided not to get it but that decision has implications.

A good continuance of the previous books in the series. My only disappointment was that it wasn't the conclusion. I was under the impression that 'Spark' would complete the storyline. I don't think there are any more written yet...

Another edge of your seat Post Apocalyptic/Dystopian novel from Evan Angler. This story continues on where the last left off, but also gives us some more back story, I believe on our Anti-christ character. There is also some interesting "internet" stuff. This book is set across the ocean from the first books, and thankfully, ties everyone together at the end. I can't wait for the next one!!!

I went through the first three books in under a day each, so I was on tenterhooks waiting for this one. It was not what I was expecting - in the best way possible! Usually authors of big series play it safe and the middle books get kind of boring, but book four of the Swipe series takes you to the

other side of the world and introduces you to a whole new set of characters who have never met Logan, Lily, and the rest of the gang from the earlier books. Nevertheless, I think Spark is my favorite book of the four. Without giving any spoilers, let me just say that I really liked the new characters and plotlines (especially Ali, who is very relatable and funny, if somewhat wise beyond her years). There are also a lot of really creative sci-fi ideas in the book, which open up whole new perspectives on the world of the AU/EU (and beyond!). By the end of the book, I could clearly see how Spark fits into the overall story, with a vague sense of the shape of things to come. I'm SO excited to see how Mr. Angler weaves the threads of this book into the others going forward. More Ali, please! So in short - I was surprised and delighted by the turn the story has taken with Spark! Mr. Angler is a very talented writer with great ideas that make you think, and the risk he took with this book definitely paid off. Loved it, 5 stars, can't wait for the next one!

My teen boys love this whole series. They couldn't wait until this new one came out and it was read immediately by both of them. Great series!

My daughter loved it!
