# Foolish Physics (A Weird History Of Science)

## **Synopsis**

Physics deals with energy like heat and sound, forces such as gravity, what's in a lightning flash and why planes crash. Physicists risked their lives with dangerous experiments and some blew themselves to pieces. In this book, read about the monk who tried to fly like a bird, how bath time proved a gold crown was fake, and why electric shocks were measured by how high they made people jump.

## **Book Information**

Series: A Weird History of Science (Book 1410)

Paperback: 56 pages

Publisher: Heinemann-Raintree (January 1, 2007)

Language: English

ISBN-10: 1410923827

ISBN-13: 978-1410923820

Product Dimensions: 9.1 x 6.2 x 0.2 inches

Shipping Weight: 5.6 ounces

Average Customer Review: 4.5 out of 5 stars 2 customer reviews

Best Sellers Rank: #5,129,760 in Books (See Top 100 in Books) #96 in Books > Teens > Education & Reference > Science & Technology > History of Science #385 in Books > Teens > Education & Reference > Science & Technology > Physics

## **Customer Reviews**

John Townsend has been in teaching for 25 years, and has been a full-time writer since January 2003. He has written more than sixty books for young people, on such wide-ranging subjects as monsters, urban legends, spiders, computer crime, and spies. He has also written the recent thrillers *The Hand* and *The Omen and the Ghost*. He lives in England.

Fun reading in DK style. Students who are intimidated by Physics will find that Physics can be foolish and phun! (phonetic spelling on purpose) Although it is written for younger students (Gr. 4-6) I think grades 7-9 would still find the information interesting.

My son read this, and 2 other "Weird History of Science Books" for a book report project. This (and the others) are great science books teaching kids about all things in science that are weird, funny, outrageous, super cool, etc. This book is divided into the following chapters and sub

categories:Risky Science- Fantastic physicsIn the Beginning- Ancient antics in the air- Leaping from the bathtub- Got it!- Stars of the Middle Ages- Bursting with ideas - and more- Brahe's beliefs- Galileo in troubleBeating Gravity- Getting off the ground- Falling apples- Heavy thinking- Rocket science- Up and away-Fighting gravity- Danger in the air- To the moon- Earth-shattering science- Back with a bump- Human errorCrackling Electrics- Fizz, crackle, pop- Deadly shocks- Freaky Franklin- Lit up by Lightning- Freaky, frazzled, and fried- Shockers of their day- Making power- Curiosity killed the cat (almost)- Electric lightMaking Waves- Let there be light- Waves from far away- Can you believe it?- Exciting X-rays- Saving lives- Magic microwaves- Splat!Yesterday, Today, and Tomorrow- The nuclear age- Mind- boggling problems- Faulty physics-Science fact or science fiction?- Space tourist arrives at ISS- Foolish future for physicsPhysics TimelineFind Out MoreGlossaryAccording to my son, this was the best of the 3 "A Weird History of Science" books he read. He also read "Bizarre Biology" and "Outrageous Inventions" from this series. I believe there are 1 or 2 more books in this series that I did not mention. Recommend.
