This is a good reference and starting point for anyone wanting help with diabetic meal planning. I've tried several of the recipes and found some good and others great. And surprisingly enough the meals really were quick to make, which was nice on those busy weeknights. The nutritional information that came along with each recipe was very useful in helping me decide which recipes to try. With some of the recipes, I tweaked the ingredients (to adjust for sodium content for example) and they still turned out alright. I found the chicken recipes to be the best ones. With respect to those concerned about the "high" carbohydrate content of some of the recipes in this book, I will only say this: diabetics still need carbs. Otherwise our cells will lack the fuel it needs to properly function. It's the amount of carb consumption, not the type of carb, that we should be concerned about. Too much without adequate exercise to burn it off is bad. Too little and we're no better than starving

ourselves to death. Everything in moderation. That's why good overall meal planning is important to us diabetics. I bought this book after having consulted with a registered dietitian. And while she did not specifically recommend this book (or any other) she did help me with the basics of nutrition and to help me plan meals specific to my needs. It's important to note that no cookbook should replace the need to speak with a registered dietitian as well as your own doctor in helping you manage your diabetes.

My husband was told he's prediabetic and needed to get his house in order so to speak. I checked this book out from the library along with several others and this is the one I'm buying. All the recipes are tasty and low in fat. They seem to balance the carbs and the protein so I don't have to worry about that aspect of cooking. I'm amazed at the things I can cook that I would normally think are verboten to someone watching calories. The mac and cheese was as good as full fat versions I've had. We've also tried the Spicy Gumbo and thought it was very tasty and all the recipes are quick with not too much preparation. I noted that one review said there were too many carbs, my husband is supposed to eat between 25 and 40 per meal so for us this was perfect.

This book may be for those who want to cook comfort food in a diabetic fashion. I was hoping for more low carb. Not too impressed with the recipes, either.

I have cooked a few of the recipe's and found them very tasty. I just found out that I'm a diabetic type 2 and my Son who is also type 2 diabetic told me about this book he loves it. This book is a must have and found it easy to follow and the food is great. Yes I would recommend it to others. Ada

Typical cookbooks have great recipes, good photos, but leave the dieter guessing what carbs and calories they contain. Not so here; my wife says they are not only easy recipes, but give her control over her intake. Try this one, you will keep it.

I had this book sent to my dad who is diabetic. My mom cooks all his meals and found this book very helpful with yummy good recipes. The price is right with easy to follow recipes.

It is a very good book. Many good recipes.

I was looking for quick diabetic recipes and as very pleased with the selection of meals nicely laid

out. I am relly happy I selected this very helpful book.
