Marx's Concept Of The Alternative To Capitalism (Historical Materialism Book)

Synopsis

In contrast to the traditional view that Marx's work is restricted to a critique of capitalism; and that he consciously avoided any detailed conception of its alternative; this work shows that Marx was committed to a specific concept of a post-capitalist society which informed the whole of his approach to political economy.

Customer Reviews

âœThis is a timely and important book. Exploring the whole range of Marxâ™s texts, Peter Hudis makes a powerful case for a coherent Marxian vision of a society beyond capitalism, alienated labour and the commodity form. Thanks to Hudis, readers interested in anti-capitalist alternatives and Marxâ™s radical worldview finally have the work theyâ™ve been looking for.â•David McNally" A particular strength of Hudis's book is that it examines the full sweep of Marx's writings, rather than focus on one particular text or period of Marx's life. No stone is left unturned in attempting to uncover the implicit conception of an alternative. The scope of this allows him to include a number of texts which are often overlooked in this discussion, and offer a number of novel interpretations of works usually discussed in different contexts."â•David Swain, Marx and Philosophy Review of Booksâœ The main strength of [this] book is that in following Marxâ™s writings from 1839 to 1881 Hudis has indeed found many implicit and explicit indications about a possible future non-alienating society. His interpretations are based on Marxâ™s writings as a

whole and allow the reader to hear Marx think over the course of forty years. At the same time, the author is well versed in political economy and the writings of the various schools of Marxism from Marxâ™s time on, and reveals that he has thought through a variety of points of view and criticisms when presenting his arguments.â•â• Radical Philosophy Review“This is a timely and important book. Peter Hudis Ph.D. (2011) in Philosophy, Loyola University Chicago, is Professor of Humanities and Philosophy, Oakton Community College. He has published extensively on Marxist theory and is General Editor of The Complete Works of Rosa Luxemburg

Fascinating, interesting, enlightening, well researched, well written, clear, fairly concise. Most of us when asked about what Marx wrote about a future communist society say, he didn't write much about that. Peter Hubis decided to say more. Notice the similarity between the hints Marx makes about a communist society and the concept of Democratic Confederalism described by Abdullah Ocalan (and the ongoing project by the Kurds and their allies building an autonomous new society in Northern Syria).
