I was previously using the Case Review series throughout most of my residency, when I discovered this series during my senior year. Thank heavens because RadCases is the way to go. There are only 100 cases per book, which makes it easier to get through. All of the cases are reasonable (unlike Case Reviews challenge section). MOST importantly, the answer format gives you a Top 3 differential and best answer which is more how "real" case conferences are.

I like the radcases series, they seem to have more relevant cases than some other review series. There are a lot of typos in the book but they don't seem to distract from the learning too much. They explain the imaging findings after each case and give nice pertinent info. I would recommend these books.

Comprehensive variety of GU cases. Good explanations. Too many typographical errors that can mislead reader. Needs a good revision and correction of these errors.

thank you so much , very fast shipment and good dealing and the shipment exactly as described
