Leadership And Training For The Fight: A Few Thoughts On Leadership And Training From A Former Special Operations Soldier

Synopsis

Tested and effective leadership and teaching advice based on riveting combat stories from a Special Operations veteran. In *Leadership and Training for the Fight*, MSG Paul R. Howe, U.S. Army Retired, shares ideas on leadership that he has developed through extensive combat experience. Howe tells riveting stories of military operations and analyzes leadership concepts. He also gives advice on how to understand students and how to refine your teaching methods. Written with the unique insight of a Special Operations soldier, this book is the perfect guide for anyone interested in improving leadership skills in civilian or military situations.

Best Sellers Rank: #118 in Books > Audible Audiobooks > Politics & Current Events > Freedom & Security #158 in Books > Audible Audiobooks > Science > Technology & Engineering #170 in Books > History > Military > Intelligence & Espionage

Customer Reviews

I was a tad skeptical obtaining this manual fearing it to be a rehash of Howe's two older works, but I was pleasantly surprised at the dept of new and updated material contained within this book. Sure there is some overlap, but it is good overlap, as in reviewing standards that need to be maintained at a highly proficient tactical level of operations. Howe not only offers more of his real world, operational stories concisely written, in order to convey key principles of sound tactical practices and procedures, without giving "trade secrets" to the "enemy" (who will obviously be studying this manual, too), he also provides at the end of each well written chapter, a conclusive summary of key points to study, improve upon, sustain and/or change as one progresses in experience and training. The book is quite comprehensive, insofar as how and why one must prepare as both leader and innovative, out of the box thinker, if one is to be truly an effective and efficient tactical "fighter." The book possesses an easy to read and follow format with precise outlines of essential

know how and applications that will guide the reader to being more appreciatively mindful of key elements of not only how to go about creating training paradigms, but how to properly maximize implementing said training paradigms for the "fight." All through the book, Howe emphasizes the great importance of proper mindset, mindset, mindset if one is going to a leader men will willingly follow into harms' way, and who is capable of actually leading men in the utter chaos, duress and mayhem of killing combat. All superior systems possess built in redundancies, and this book is no exception, but as within great systems, they are much needed and do not need to be downgraded. So if it sounds as though Howe is repeating himself at times, it is for that very specific reason of drilling the necessary survival mechanisms into high working order. This book, I personally believe, illustrates that Howe has grown and matured as a better writer, tactical instructor and teacher of leadership principles and concepts. His extensive, real world operational skills, sound academic research and his continuing growth as a world class instructor of military and law enforcement tactical teams, brilliantly shines forth from this work, offering the consumer a mix of expertise not many others can match in this crazy, crazy world of commercial tactical training. This book needs to be read carefully, underlined, contemplated deeply, and then kept close by for immediate referencing as it will genuinely help one systematically look at, tear apart and bring to resolve small to serious problems one will surely meet when engaged at the leadership level of tactical operations in the military or law enforcement. This IS a Superb book, that MORE than delivers the truths one expects to discover in a volume that is genuine and true to its title: "LEADERSHIP AND TRAINING FOR THE FIGHT."

If you like this book will depend on your background and what you are looking for. If you are in the military or law enforcement i am sure you will give it five stars. If you aren't in those occupations your rating will be significantly less. The book is excellent in how to train assault teams for the military or law enforcement. He started each chapter with an applicable scenario. He goes into intense detail about candidate selection, how to teach them, curriculum, teaching techniques, and leadership. However if you are not in that field a person might be lost. There are some gems of wisdom buried in the tech talk though about combat mindset and on teaching. I think those things would be very valuable for just about anyone. However you will have to reach to get that wisdom.

Really, this is a 3.5 star item but I give the benefit of the doubt. You have to wade through the stories to find the wisdom, and many times the point is lost other than it being a story.... if you were a gungho military style person, you would probably give it 5 stars. I was looking for more "how to be

a leader" type information than this provided though.

The style is a bit like a drill sergeant but there is actually lots of good practical advice on training people to do difficult jobs, base upon experience. This has lots of applications outside of the military.

I have read the book numerous times and use Paul's wisdom in my training and work. The Audio is great for refreshing on topics and keeping the mind sharp. Well worth the time and expense.

Perfect resource for any tactical medic to add to their library. It does not leave anything as "a given". It tells you how to survive by planning.

Great book. Lots of really good information from a very knowledgeable Instructor. Look forward to attending a class.

What can I say? A book written by Mr. Howe, a tried and true warrior! No matter what your profession is, you will think and perform better after reading this book!
