Through The Lens Of Anthropology: An Introduction To Human Evolution And Culture

Synopsis

Through the Lens of Anthropology is a concise but comprehensive introductory textbook that uses the twin themes of food and sustainability to illustrate the connected nature of anthropology's four major subfields: archaeology, and biological, cultural, and linguistic anthropology. By viewing the world through the lens of anthropology, students will learn not only about anthropological methods, theories, and ethics, but also the ways in which anthropology is relevant to their everyday lives and embedded in the culture that surrounds them. Beautifully illustrated throughout, with over 150 full-color images, figures, feature boxes, and maps, this is an anthropology text with a fresh perspective, a lively narrative, and plenty of popular topics that are sure to engage readers. A strong pedagogical framework structures the book: each chapter features learning objectives, glossary terms, and chapter summaries, as well as review and discussion questions which guide students' analysis of the topics, themes, and issues raised in the text. This book is interesting to read, manageable to teach, and succeeds at igniting interest in anthropology as a discipline.

Customer Reviews

Many students will take just one elective course in anthropology. For that reason, it is important to use a textbook written for the student, and one they will enjoy reading, not a text written just to appeal to the professor. Through the Lens of Anthropology is the one textbook that achieves this goal. Highly recommended. (Vaughn M. Bryant, Texas A&M University) Through the Lens of Anthropology is an innovative and exciting book – not something I say lightly about a

textbook! The examples are effective, the text is engaging, and the themes of food and sustainability provide enough flexibility to allow me to match the text to my own teaching goals. It is also the first truly North American approach to four-field anthropology to cross my desk. This is a book that will appeal to instructors and students alike, and one that I look forward to using. (Erin Halstad McGuire, University of Victoria)

Robert J. Muckle is Professor of Anthropology at Capilano University in North Vancouver, Canada. He is the author of several textbooks, including *Introducing Archaeology* (second edition, 2014) and *Indigenous Peoples of North America* (2012); writes an online monthly column for *Anthropology News*; and is actively engaged on Twitter (@bobmuckle) in anthropology and archaeology related discussions. Laura Tubelle de González is Professor of Anthropology and the faculty Environmental Sustainability Coordinator at San Diego Miramar College in Southern California, United States. She has won several teaching awards and is a past president of the Society for Anthropology in Community Colleges, a section of the American Anthropological Association that focuses on teaching anthropology.
