Zoologist Jim Kavanagh has made a career out of introducing novices to plants, animals, the

sciences and world cultures. In addition to creating over 500 simplified nature guides, he has also authored guides to languages, cities and outdoor skills. An avid traveler and backpacker, Kavanagh's path has taken him around the world to many remote destinations including the upper , Africa, Australia, and the Arctic Circle (and this is just the As). He is also the author of a series of state-specific guides to common species and natural attractions and a children's book on evolution.

Bought as a gift for a bird lover in the family to help her identify local birds. She was happy with this gift.

I purchased this to have a quick reference for birds outside my window at the feeder. It's a great quick reference card and nothing more. The pictures are decent drawings not detailed and the information on the card is interesting although it offers only a few extra details about a few of the birds. The measurements are helpful. Good to have at your window for quick reference.

I find this a great aid in helping identify the visitors to my feeders. It is well organized, light weight with a nice formate

I travel and am a birder. I also photograph. When I see a bird, I photograph the bird and before adding it to what we call "life lists", I want to be 100% sure what bird I saw. This Guide is excellent. I collect them. We are going to New Hampshire in October and I am ready for the fun of travel, birding and photos!

Love this bird guide!

Good compact size for carrying on person or in a car. Very handy.

This reference card is great, is laminated so won't tear or get ruined if it gets wet. Easy to use and carry. Quick and easy identification of birds when your out on a trail. I love this little guide!

My grandchildren enjoyed sitting on he deck identifying local birds in central new Hampshire. Easy to use and manipulate for small hands.
