Pop-Up Cards: Step-by-step Instructions For Creating 30 Handmade Cards In Stunning 3-D Designs

Synopsis

With over 30 inspirational projects detailing a range of 3-D papercraft card designs for any occasion, Pop-Up Cards has something for everyone. From whimsical animal shapes to more sophisticated and intricate flower designs, pop-ups can add a sense of fun and elegance to any occasion. At the heart of pop-ups lie a few simple mechanisms, and no matter how complex the design, the "pop" can be achieved using one of a few basic techniques. Pop-Up Cards covers these techniques, including essential folds, creating slots and tabs, and adding rotating discs and springs. Simple step-by-step instructions will make even a beginning papercrafter into an advanced paper engineer. Each technique is followed by a selection of projects that demonstrate its use, so you can build up skills and become confident enough to begin making their own pop-up designs. Templates for each project at the back of the book help you get started. Whether you love crafting or want to make something special for any occasion, Pop-Up Cards has something for everyone. The 30 inspirational projects included offer a range of card designs for birthdays, weddings, and celebrations, as well as ornamental projects to display or to give as gifts.

Customer Reviews

Emily Gregory studied design in Sydney, Australia. She has worked in publication design for a number of years and has a strong interest in typography, paper craft, and illustration. As well as running her own book design studio, she also teaches visual communications at the University of Technology, Sydney. She is the author of *The Little Book of Lettering* and writes about all things

paper-based and design-related on her blog, The Daily Smudge.

Good ideas but seems a little difficult and intricate. I was hoping for something more basic.

Enjoying making intricate cards

I received a free copy of this book to review. I am really impressed that all of the projects in this book can be completed with the provided templates, some craft paper, and a basic toolkit that includes some sharp scissors, a craft knife and a cutting board. No fancy punches, dies or cutting machines are required. The results are fantastic. There are 30 projects in the book, each one teaches a different technique for making a pop-up card. The projects are arranged with simple projects in the beginning and more complex projects later in the book but all of the instructions are clear and none of the projects appeared to be overly difficult for a patient and careful person. The designs range from playful cards that would be fun for a child to very sophisticated three dimensional constructions. Some have moving parts or hidden treasures inside. Many of the designs could be incorporated into other projects or used together to create a pop-up book. Enough information is provided about how the designs work so that the techniques could be adapted to other projects or different designs. Although a patient beginner could use this book, I think that some experience with cutting paper with scissors and craft knives would be helpful. This is not a book for young children since even the most basic designs require skill with a craft knife. There are projects that a child could help with like the exploding robot, but none that a child could successfully make on their own. Many of the card designs would delight a child and would be fun to make.

This is a beautiful book filled with great pop-up card tutorials and patterns. I would call most of the cards more like 3-D paper art. They are not your basic pop up cards. There are intricate designs that if you are handy with an x-acto knife you will have a mini masterpiece when you are done. There are some playful designs like robots and dragons that a child will have fun opening over and over. There are a whole variety of construction styles that will surely inspire you to try designs of your own after you make the ones in the book.

I loved reading pop up books when I was a kid and how they came to life when you opened them up. I like how the cards in this book are more than just a card, they are like a miniature piece of art. Plus, they also make a lovely keepsake for a loved one, too. I love the cute penguin and gorgeous

carousel. I've started working on the daffodil card, since it looked a little easier for me than some of the others. I really hope to work up to making the medieval castle!

The merry-go-round directions were worth the price of the book. I was able to use the mechanics to make different types of round pop up cards. Most of the other projects were too specific for my needs, but was able to learn some good techniques.

I love making homemade cards. I have never made pop up cards. This book is loaded with great ideas. Some easy some more complicated. All beautiful!

love it! Thanks!
