The Soareses' guide to Northern California includes hikes in the San Francisco Bay area, the Trinity Alps, the Southern Cascade Range, and northern Sierra Nevada. Warren's Arizona guide, which starts with Grand Canyon trips and then roams around the state, includes the San Francisco Peaks, White Mountains, Mogollon Rim, Santa Catalinas, and Chiricahuas. Both these hiking guides follow a logical and useful format, starting with general comments on topography, climate, flora, and fauna. They then move to more specific detail on hiking difficulty, time (round-trip), elevation start, high (or low) point, season, and U.S. Geological Survey topo map reference. Well-written descriptions of each hike will give readers ample information to decide whether or not a hike is of interest to them. The useful format integrates a map (usually about half a page) and a photo of the surroundings into each approximately two-page entry. Recommended for public libraries. Good resource for hikes in Arizona. It's especially helpful when trying to determine water availability,

as that's pretty important when planning a hike in Arizona. I have only completed one hike so far and the information on how to get to the trailhead and attractions on the trail have been very helpful. Good resource.

There are many nice hikes in this book. Well worth it.

Great start to find good hike locations.

An excellent hiker's resource. Provides hikes all across the state and for all seasons. An overview map lets you select candidates by area. Each hike is well described. Each specifies distance, difficulty, altitude range, recommended season(s), topo quad and controlling authority (BLM office, Natl Forrest, park service, county, state, etc.) Each comes with a small map of the trail and road to trailhead, making trails easy to find and follow. For most hikes, this makes the topo unnecessary.

Just moved to Arizona and getting back into hiking. This tells me about the best trails around the state. Love the book. Looking forward to the many explorations I can have with this as my guide

Valuable information like Distance, Difficulty, Hiking Time, and Elevation is listed above each hike. The book covers the entire state picking out the most popular trails from each area. The trail descriptions are accurate and very usefull.
